

# R12 Customer Main Tables Relation

## R12 Customer Main Tables Relation

HZ_PARTIES(hp)
<b>EBS Parties</b> *Customer/Supplier/Bank...都是Parties *在Customer維護畫面, 查詢出來有' Registry ID' (hz_parties.Party_number) 那一塊資料, 就是Parties *Unique Key: Party_ID

HZ_PARTY_SITES(hps)
<b>Party site營業據點</b> *Customer/Supplier site都會指向此一Table, 這個叫Party Site, 不是Customer Site或Vendor Site. *它與Operating Unit(OU)無關, 同一Party Site可以Assign給多個OU(Customer/Supplier都是) *Unique Key: Party_Site_ID *與HZ_PARTIES 關聯式: hps.Party_ID = hp.Party_ID

HZ_LOCATIONS(hl)
<b>Party營業據點地址</b> *Customer/Supplier Party Site實際儲存地址的檔案 *Unique Key: Location_ID *請注意CoUntry欄位必須存在於FND_TERRITORIES.TERRITORY_CODE;尤其是R12版本, Country與EBTAX calculate tax有極大關係(非Territory Code, 可能會發生Calculate Tax Error) *與HZ_PARTY_SITES 關聯式: hps.Location_ID = hl.Location_ID

HZ_CUST_ACCOUNTS(hca)
<b>Customer Account</b> *在Customer維護畫面, 查詢出來看到' Accounts' 那一塊資料, 就是Customer Account *Unique Key: CUST_ACCOUNT_ID *Account Description: hca.Account_Name *Account Number: hca.Account_Number *與HZ_PARTIES 關聯式: hca.Party_ID = hp.Party_ID

HZ_CUST_ACCT_SITES_ALL(hcas)
<b>Customer Site(注意:與Party Site不同)</b> *在Customer維護畫面, 查詢出來在' Accounts' 按下' Details' , 看到的' Sites' 頁籤就是此一table的記錄 *在這一層級, 就要指定Operating Unit ID(ORG_ID) *在查詢畫面上Site Number條件, 指的是以上hps.Party_Site_Number *整塊Sites的地址, 抓的是hz_locations table, 它可以共用, 所以, 假如同一個Party Site Number查詢出來修改地址, 修改的是HZ_LOCATIONS *Tax Profile上看到的Site Number, 是hcas.Cust_Acct_Site_ID *Unique Key: CUST_ACCT_SITE_ID *與HZ_PARTY_SITES關聯式: hcas.Party_Site_ID = hps.Party_Site_ID *與HZ_CUST_ACCOUNTS關聯式: hcas.Cust_Account_ID = hca.Cust_Account_ID

HZ_CUST_SITE_USES_ALL(hcsu)
<b>Customer Site Usage</b> *也就是' Business purposes' 頁籤的資料(Bill To/Ship To.....) *Unique Key: SITE_USE_ID *與HZ_CUST_ACCT_SITES_ALL關聯式: hcsu.Cust_Acct_Site_ID = hcas.Cust_Acct_Site_ID *在訂單明細行OE_ORDER_LINES_ALL裏的SHIP_TO_ORG_ID / INVOICE_TO_ORG_ID儲存的就是hcsu.SITE_USE_ID
